GRC essentials

GOVERNANCE | RISK MANAGEMENT | COMPLIANCE

DEAR READER,

Continuing our project implementation, we are proud to share with you more news on what was done in the second half of our activities. **The project website is ready and translated in English, Greek, Hungarian, Bulgarian, and German. Moreover, the project's Poster and Flyer are ready!** Both the poster and the flyer can be found on the project's website.

Just click here!

As the project officially started on **1 October 2019,** we have done a lot of work during the first eleven months, concerning **Intellectual Output 1**: **GRCEssentials Curriculum**. Governance, Risk and Compliance (GRC) **will support organisations of all sizes** to navigate through this volatile environment, which is abundant of risks and challenges, as well as **provide opportunities for those who are well prepared and properly organised.**

The Curriculum will provide the foundations and the principles of GRC and the **GRCEssentials One Model** will act as a guide for SMEs, SMOs and micro-enterprises on how to implement GRCEssentials principles in their work environment.

The proper application of the principles related to GRC will **enable your organisation to operate efficiently and effectively, ensure that risks and opportunities are assessed in a structured manner and continuously comply with applicable laws and regulations.**

The thorough research has led us into developing the **GRCEssentials Course**, based on the **GRCEssentials Curriculum**.

To back all of the above with statistical data, we also did a large survey involving target groups in all of the EU countries, on which we have based our insights.

Furthermore, the **GRCEssentials Curriculum** is the first Intellectual Output of the GRCEssentials Project which is completed. It combines the material developed for 5 learning areas - Corporate Governance, Risk Management, Compliance, Data Governance and Project Governance - into the **GRCEssentials One Model**.

For more information just click here.

What's next in the **"GRCEssentials"** project?

- **GRCEssentials Learning Platform** was finished and now is on internal testing. It will be given for external testing to users early in 2021.
- **GRCEssentials Certification** examination process was started and it will be finished in the first quarter of 2021.
- **GRCEssentials Work-based Methodology** development will be started in December 2020.
- **Next online project meeting** is planned in December 2020.
- We will keep you posted on our activities!

Until next time, keep safe!

GRCEssentials team!
